SPRING 2024

WoodBeQuiet Slats 8-inch Wall Panel in Boardwalk with Deep Brown V-cut

## Mastering the fourth dimension of design – sound

Beautiful. Functional. Made with uncompromising precision. Acoufelt products are dedicated to Making Quiet™ in shared spaces for better working, learning, and living.

Through a holistic approach to interior soundscaping, and a commitment to excellence that extends from fiber sourcing through product delivery and beyond, we exist to help you create positive human experiences in every space.

Gracefully curb sound and reverberation throughout a room or within targeted areas, thanks to innovative ceiling products. Ideal for quieting sound levels in meeting rooms, performance spaces, or anywhere people gather.

# Ceiling

Architizer A+Awards winner

Award-winning **SoftenUp™** modular ceiling frames infuse a warm, welcoming atmosphere. Each tile, comprised of linear slats, fits seamlessly in standard 15/16" T-grid drop-ceiling grid systems for effortless installation. Choose the profiles, sizes, and colors that suit your project.

SoftenUp Foothill Ceiling Frames in White Oak

Acoustic ceiling **baffles** provide added surface area to ceiling surfaces to absorb and soften sound in naturally noisy or intentionally quiet areas. Easy to specify and install, ceiling baffles are a visually attractive, highly effective first step in any soundscaping strategy.

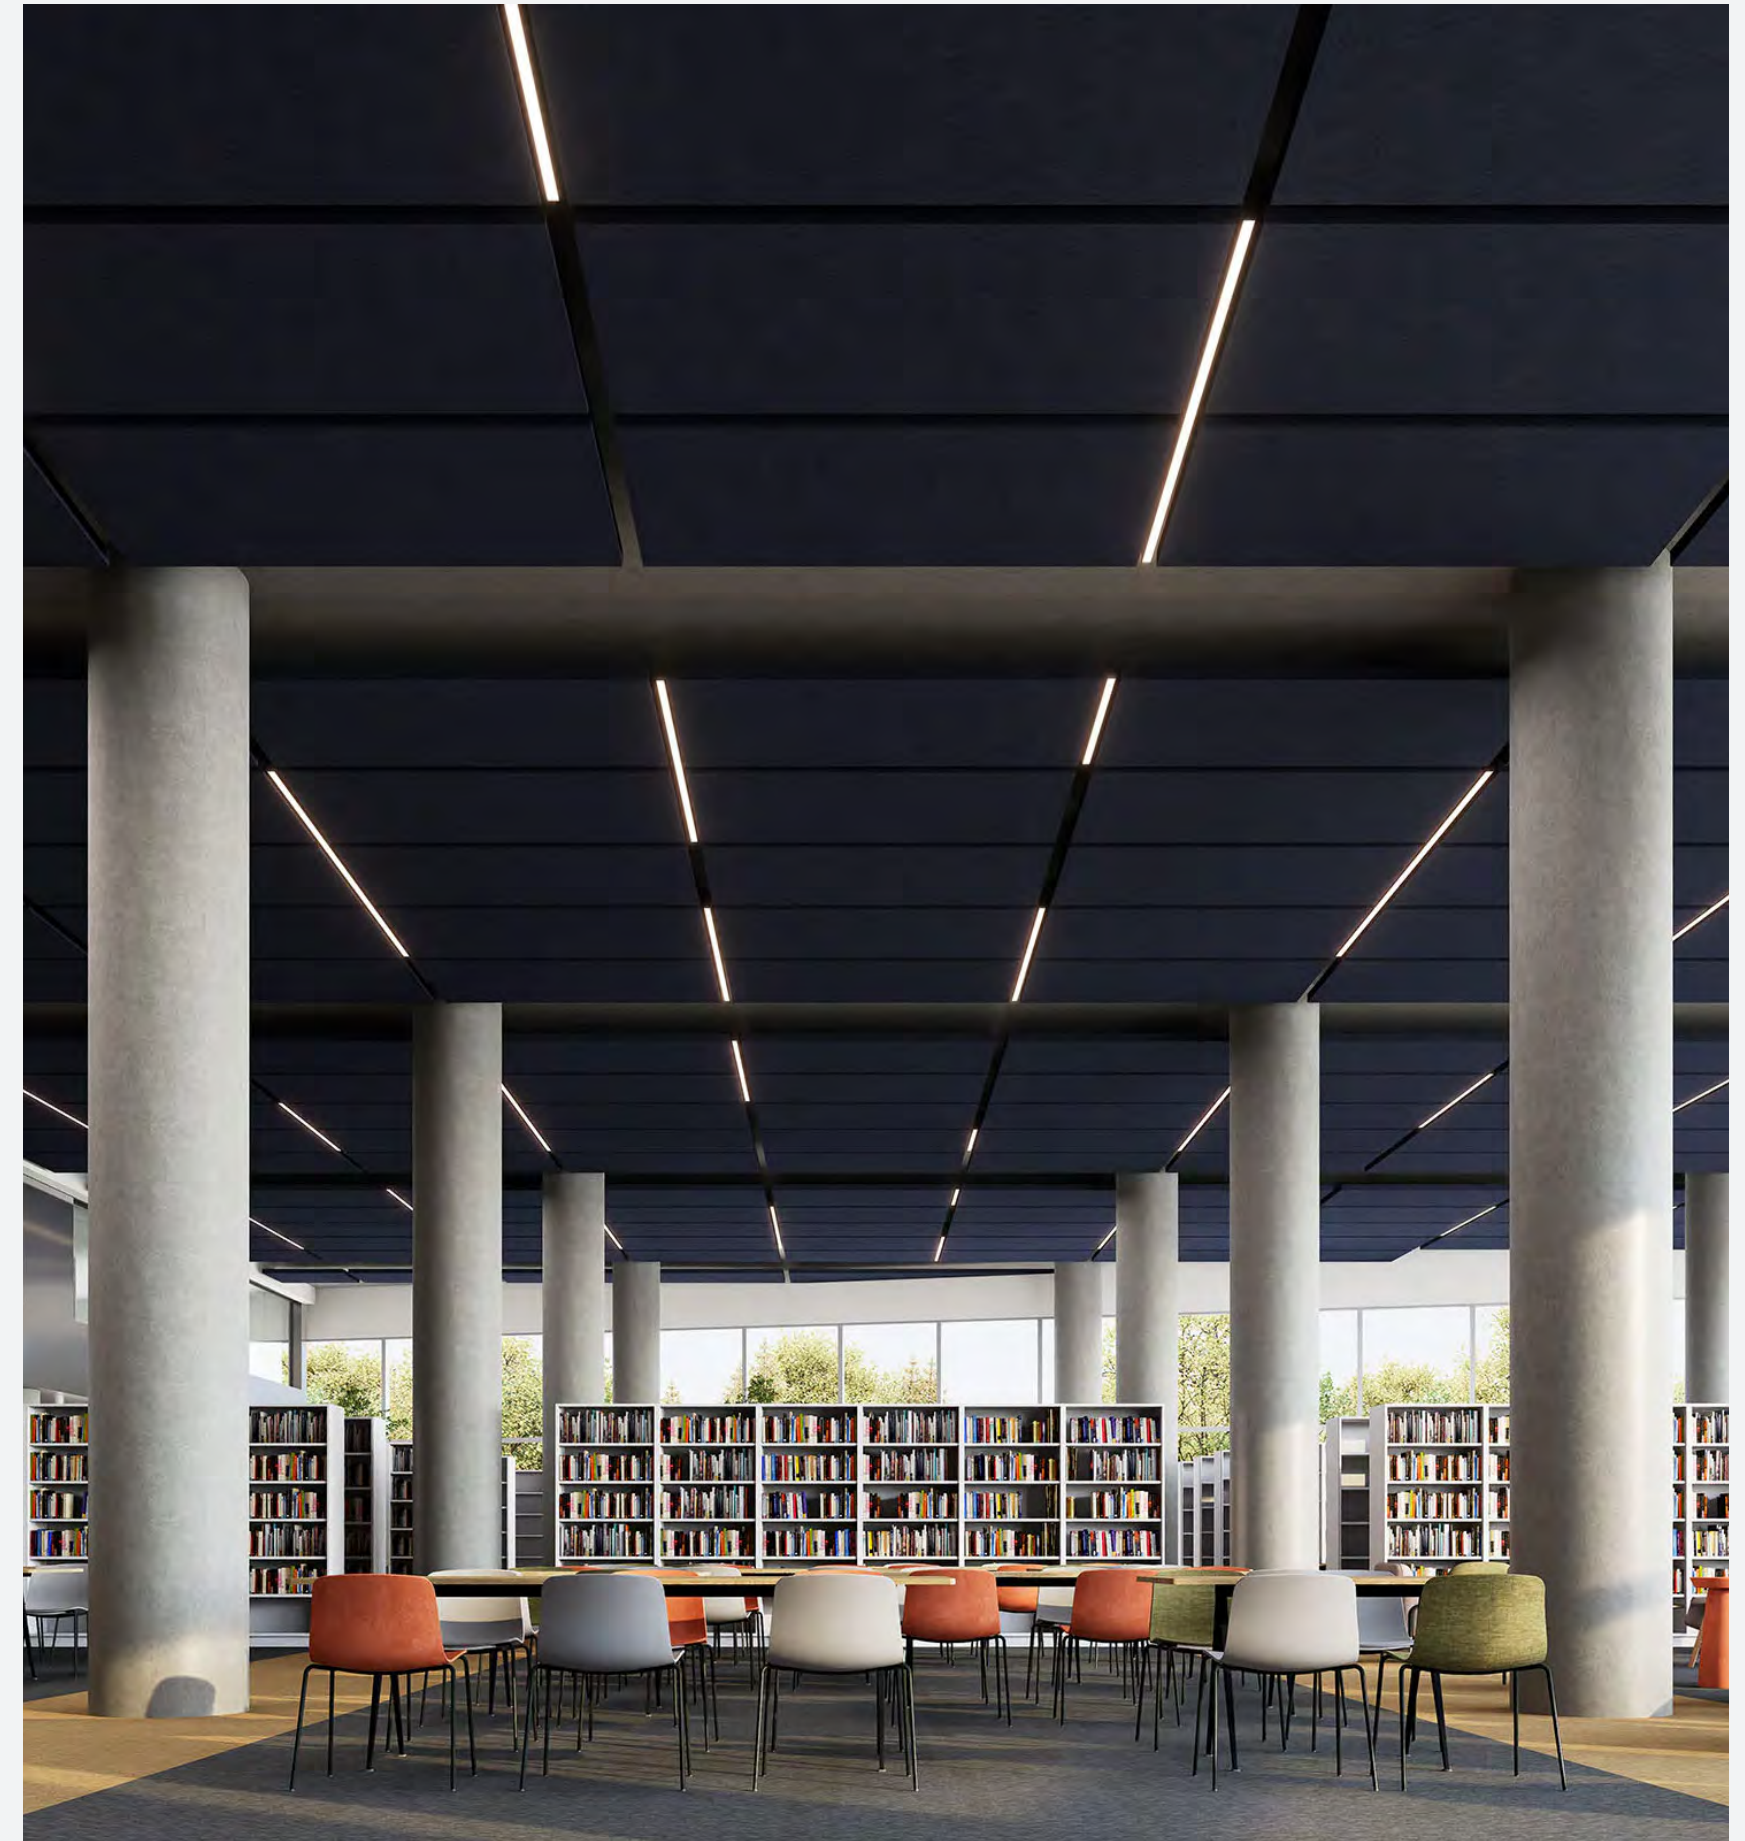

Linear Ceiling Baffles in Almond

Top: Ripple Ceiling Baffles in Platinum and Slate; Fracture Wavelength Wall Panels in Wasabi  
Bottom: WoodBeQuiet Wall and Ceiling Planks in Lyed Larch

Canopy Ceiling Clouds in Flint

# Wall

Acoufelt acoustic panels rely on earth-friendly felt to gather and eliminate unwanted sound. Choose from multiple thicknesses, more than 40 colors, and myriad textures and patterns to sculpt and divide space.

Fracture Two-Tone Dune Wall Panels in Charcoal and Ivory

# Thirty true-to-life woodgrains

WoodBeQuiet Wall Planks in Weathered Slate

**WoodBeQuiet** elements instill the beauty and sophistication of wood while supporting healthy soundscapes. Proprietary Acoufelt technology applies high-res woodgrain images to smooth, sound-absorbing felt for no-compromise acoustics. Select from 30 options and combine finishes for a singular look.

WoodBeQuiet Wall and Ceiling Planks in European Larch

Engineered for optimal sound absorption, sustainability, human safety, and smooth surface printing, Acoufelt acoustic **panels** offer astonishing flexibility and design capacity.

Top: Pixel Triangle in Popcorn and Almond  
Bottom: Creative Cut Screens Waterfall in Flamingo

Design one-of-a-kind soundscaping mosaics with Acoufelt acoustic wall **tiles + shapes**. Combine colors, tones, and patterns in geometric and organic shapes to reflect a client's brand or design concept.

Tasked with creating an inviting space that incorporated colors, textures, and motifs from Southeast Asia, Zest Building Design recognized the role of acoustics in delivering a pleasurable dining experience. The firm reached out to Acoufelt for a custom solution to expertly merge high performance and stunning aesthetics.

The concept – a tessellated, three-dimensional acoustic solution inspired by dragon scales – was designed to line the upper walls and frame the ceiling with a distinctive texture.

Acoufelt printed the shape and pattern onto 12mm panels, then added bevel cuts to give the appearance of overlapping scales. During installation, panels were slightly overlapped to complete the continuous, layered look.

The finished panels achieve a minimum noise reduction coefficient (NRC) of 0.45, absorbing excess sound as well as reducing echo and reverberation throughout the space. Combined with carefully curated lighting, transportive interior design, and a delectable menu, the optimized acoustics contribute to an inviting image and atmosphere.

# Sound and wellbeing

Every element within a space sculpts the sounds we hear. Shapes, materials, objects, and inhabitants all come together to create distinct, dynamic sound environments that impact our experience.

Making Quiet is all about furthering the function and purpose of a space by considering its sensual and emotional impact and, ultimately, its effect on inhabitants. After all, unwanted sound

carries a high cost in perception, well-being, and productivity, especially in places designed for work, learning, healing, and play.

## Expect Collaboration

Even though you can't see it, acoustic design is as important as any other component of great architectural and interior design. Your Acoufelt team will help you draw from existing solutions or create new ones to bring the environment you envision to life.

## Expect Excellence

See the difference from first pencil sketch to final delivery. At Acoufelt, every member of our team is dedicated to making it easy to harness the benefits of great acoustics. This customer focus is ingrained in our culture, ensuring a level of detail and responsiveness that's earned a reputation for well-run projects and happy clients.

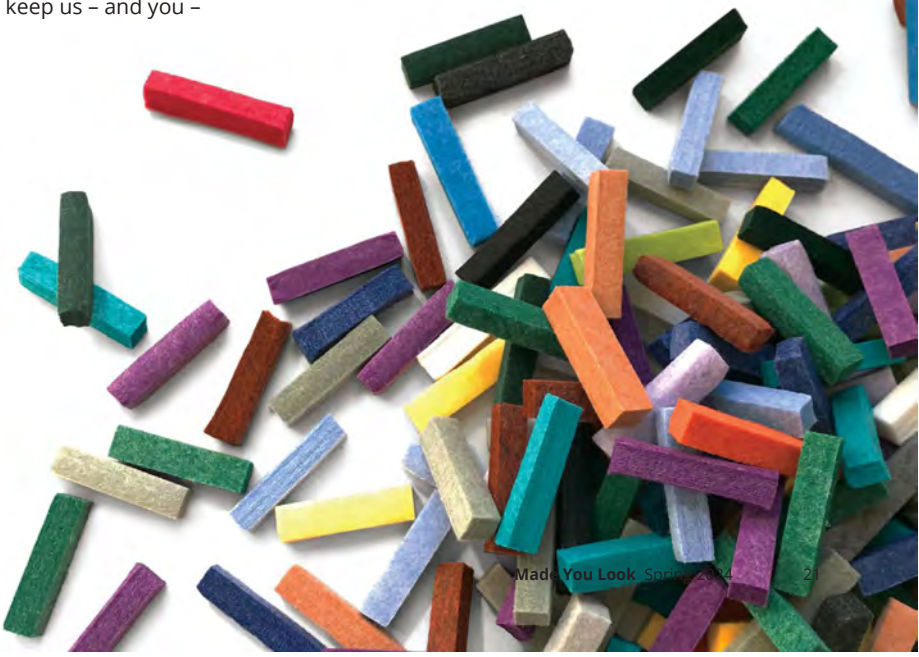

## Expect Speed

If you can dream it, we can make it – quickly. We know accuracy and time are business-critical, and we deliver samples, prototypes, proposals and finished goods faster and more reliably than anyone in the world. Deep manufacturing experience, continuous process refinements and bold innovations keep us – and you – out in front.

## Expect Sustainability

Each beautifully sustainable product is made from regenerated PET fibers with a minimum of 60% recycled content. What's more, rigorous testing against a global environmental and human safety standards ensures that Acoufelt products are safe for those who encounter them at any point in their lifecycle.
