

Spine Wall Panels

WoodGrain Collection

Spine Wall Panels showcase an innovative three-dimensional design, combining wood-printed panels with elevated solid-color patterns seamlessly layered for a striking visual effect. The interplay of organic wood textures and bold, clean shapes creates a dynamic aesthetic that enhances the depth and aesthetic of any interior.

With a variety of designs to choose from, Spine offers unparalleled creative freedom. The panels can be rotated to form customized patterns, enabling configurations that range from minimalist elegance to eye-catching layouts. This versatile solution is perfect for spaces aiming to blend natural warmth with modern design, delivering a distinctive architectural statement that balances functionality and character.

* Product available as full panels or as sections of a panel as filler pieces.
Choose any of the standard height or segments (i.e. bottom right, middle left, etc) to fill the space as needed.

How to Specify

1. Choose Panel Pattern

2. Choose Colorways

Select desired panel pattern. See recommended layouts for larger spaces. Multiple patterns can be specified together for a more dynamic design.

What is a Noise Reduction Coefficient (NRC)?

You'll find the NRC rating in the specifications of all of our products. This acronym stands for Noise Reduction Coefficient, and is expressed as a single number, a rating that describes the degree to which acoustic products can absorb sound.

You can use NRC values to understand the overall performance of our acoustic wall and ceiling products. The higher the NRC, the better the product is at soaking up the sound.

Performance Indices: Noise Reduction Coefficient (NRC) results represent the absorption coefficients measured at the one third octave bands at 125, 250, 500, 1000, 2000 and 4000 Hz rounded to the nearest 0.05. Acoustic testing has been performed according to the methods mentioned above. Customization of installation of the product could alter the results. Sound Absorption Average (SAA) indicates the absorption coefficient average for the twelve one-third octave bands ranging between 200 and 2500 Hz.
